

Product Monday: BeveLED 2.0 FLAT Downlight by USAI

Posted on April 20, 2015, 6:00 AM, by Craig DiLouie, under [Products + Technology](#).

USAI Lighting's BeveLED 2.0 FLAT downlight measures less than 4" tall from the finished ceiling plane to the top of the housing and presents a 2-3/4" housing height in the trim version and a 3-3/8" tall housing height in the trimless, providing design flexibility.

The downlight emits up to 2,350 lumens at up to 84 lumens/W. It is available with multiple dimming driver options and features a custom-designed heat sink for good thermal management. The luminaire is serviceable through the aperture, enabling easy tool-less field replacement of light engines and drivers.
