A USAI LIGHTING SOLUTION FOR DAYLONG CANDLELIGHT AMBIANCE

Harsh, bright light can create a sterile and lifeless ambiance. For any business where daylong, year-round candlelight warmth and glow are preferred, the BeveLED® 2.1 LED downlight family by USAI Lighting is recommended.

The 2,200K-dedicated light engine is the perfect architectural LED lighting solution for a variety of commercial spaces – whether to create an intimate dining experience, a meditative treatment room in a wellness center, or a color-complementing dress shop fitting room.

BeveLED 2.1 LED light fixtures emit a soft candlelight radiance while ensuring high optical performance and perfect color consistency. One of the most comprehensive product families, BeveLED 2.1 is available in downlight, adjustable and wall wash configurations.
