

## More than Just Mood Lighting

As the world of LEDs continue to evolve, manufacturers are fervently trying to get the latest technologies in the hands of consumers. But with a flood of options, end-users are oftentimes inundated with gadgets that have short shelf lives or half-heartedly address their lighting goals. For designers and architects in need of creating flexible spaces, address human-centric lighting and more, USAI Lighting serves up advanced tunable white lighting to address a variety of lighting goals all in one fixture. Check out the below options to harness a host of lighting benefits.

### Supporting Circadian Rhythm

**Color Select** tunable white light [LED](#) downlights can change color from daylight to candlelight and everything in between, and can recreate the feel of natural daylight for circadian rhythm lighting needs.
