

TREND | Personal Environments

Motorola Mobility, Chicago

To attract tech-savvy employees, office designs are allowing for many different workstations and multi-sized conference rooms that allow for both social work environments and solitary areas for head-down study. At Motorola's facilities in the Merchandise Mart, designed by Gensler, amenity spaces are interspersed with benching, collaborative offices and focus areas. Underlying the design is an open-ended philosophy of encouraging employees to express their personality, adopt work styles that suit them, and arrange their workspace to meet their needs. CD+M Lighting Design Group integrated the space with sustainable lighting fixtures, lamps and dimming controls. USAI Lighting provided 6-in. diameter Cylinder 10 and recessed BeveLED 2.0 fixtures.
