NanoLED 1000

The NanoLED 1000 family (downlight, 40° adjustable, and wall wash fixtures) gives designers the efficiency, flexibility and optical control needed to combine striking aesthetics with functional application. Marrying impressive optics with a small aperture for LED sources, the NanoLED 1000 will be the first product on the market with a 2.5-in. aperture and a 10° beam.

JUDGES' COMMENTS

► “Design looks good. Aperture is small, CRI is good, it has a tight light beam, and options are good. Dimming is especially good. There is a lot to like about this fixture!”
