Architectural Lighting: 2019 Product Call Highlights

Selected from 171 submissions, these 21 products demonstrates advancements in LED performance and color control technology.

By [ELIZABETH DONOFF](#)

The latest generation of luminaires combines superior LED performance with refined dimming capabilities and lighting controls. In response to specifiers' requests for nuanced color temperature ranges, manufacturers are incorporating sophisticated color-control technologies attuned to circadian rhythms and wellness initiatives.

The following 21 products represent but a sampling of the 171 fixture offerings submitted to the [2019 ARCHITECTURAL LIGHTING Product Call](#).

Trimless Acoustic Lighting by USAI Lighting

Trimless Acoustical Lighting, USAI Lighting

A product from USAI's expanding partnership with Armstrong Ceiling Solutions, the Trimless Acoustical Lighting system enables the exact placement of USAI Lighting's BeveLED Mini and BeveLED 2.2 fixtures within 3.5" and 5" pre-cut openings, respectively, in several of Armstrong's most popular ceiling products, including Calla, Lyra, Ultima, and Optima. The luminaires can be snapped into place with a smooth, trimless edge in the acoustical tiles. BeveLED Mini and BeveLED 2.2 fixtures can be specified with any of USAI Lighting's color technology options, including classic white, warm glow dimming, and Color Select tunable white.
