

Turf and USAI Lighting integrate LED lights into acoustic ceiling tiles

Home > Commercial > Turf and USAI Lighting integrate LED lights into acoustic ceiling tiles

Chicago-based acoustics solutions company **Turf Design** and New Windsor, New York-based LED lighting manufacturer **USAI Lighting** recently announced their first collaboration, offering designers and specifiers a simple, pre-engineered way to specify acoustic ceiling tiles with integrated LED lighting fixtures.

The launch by the two award-winning companies is an update to Turf's factory pre-cut acoustic ceiling tiles, **Port** and **Urban**, which now include USAI's **BeveLED Mini** and **BeveLED 2.2**. USAI's engineered, proprietary Snap-In Mounting System paired with Turf's magnetic connection makes for an easy installation on a 9/16" or 15/16" Flat Tee Grid infrastructure.

Urban

Integration options for lighting and acoustic ceiling tiles

BeveLED Mini for Turf and BeveLED 2.2 for Turf are available in trimless round or square fixtures for Port and Urban acoustic ceiling tiles. Port is apertured and vaulted, while Urban is extruding and planar. Both are made from Turf's 60% pre-consumer recycled PET felt and offer cutting-edge aesthetic and acoustical performance.
