## Port

Turf joins forces with USAI Lighting.

May 10, 2023

**Related To:** [Turf Design](#)

Port is one of two introductions from [Turf's](#) collaboration with USAI Lighting, integrating their BeveLED Mini and BeveLED 2.2 fixtures into Turf's acoustic solutions with its Snap-In Mounting System. Port, pictured here, is apertured and vaulted, while the other option (Urban) is extruding and planar. Both are made from Turf's 60% pre-consumer recycled PET felt. Both are designed off a baffle system made with a magnetic grid that can easily attach to existing tiles for the most sophisticated in noise pollution options. Comes in five colors.
