Turf's Port ceiling tiles are apertured and vaulted. (Turf / USAI Lighting)

Turf has launched a collaboration with USAI Lighting, integrating lighting fixtures into acoustic solutions.

The launch is an update to Turf's ceiling tiles, Port and Urban, now including USAI's BeveLED Mini and BeveLED 2.2 lights. USAI's Snap-In Mounting System paired with Turf's magnetic connection makes for a seamless installation for any space with a tee grid infrastructure.

Port is apertured and vaulted while Urban is extruding and planar. Both are made from Turf's 60 percent pre-consumer recycled PET felt and offer both aesthetic and acoustical performance.
