the LittleTwos[™]

APPLICATION GUIDE

Introducing the LittleTwos™

Small, powerful and quiet runs in this **Tier Two** family of 2" aperture pinhole and 2" diameter cylinder light fixtures. Providing incredible performance with advanced glare control for visual comfort, the full family offers an expansive range of options for trim styles, trim configurations, beam spreads, housings and more.

This lighting toolbox of options gives specifiers a great deal of flexibility in a 2" fixture. Use **the LittleTwos application guide** as a reference for useful technical information to leverage this comprehensive collection in built environments of all types and sizes.

Spacing Criterion*

20°	25°	30°	50°	65°
0.38	0.42	0.54	0.80	0.96

*Spacing criterion is an estimated maximum spacing to mounting height ratio to produce acceptable uniformity on the workplane.

Deep Regress Downlight

What is UGR?

UGR = Unified Glare Rating, a measure of the discomfort glare produced by a light fixture. Best practices recommend to use lighting fixtures with UGR < 19.

About Cutoff

The cutoff angle is the lowest angle going up from nadir at which you do not have a direct view of the light source. Smaller cutoff angles are better for glare control.

KEY

Retrofit Installation

1. Insert Flex Driver Case from Below Ceiling Plane
2. Flex Driver Case Automatically Drops to 90° Angle and Reduces Plenum Height Requirements
3. Finished Installation from Below with Integral Driver

New Construction Installation

SERVICE FROM BELOW:

NCT can be specified as an accessory to RT flex driver case fixtures. 6-3/4" plenum height required for driver.

Insulation Contact and Chicago Plenum Housings (NCIC, NCCP)

SERVICE FROM ABOVE:

New Construction Above Ceiling Access Housing (ABC)

Remote Drivers for Pinhole and Cylinder

Remote drivers can be provided with mounting plates, single driver enclosures, or in pre-wired, big-box enclosures for multiple drivers upon request. The LittleTwos are compatible with all common lighting controls. Choose from 0-10V, Phase, EcoSystem, DMX, or DALI dimming.

2 Ways To Work With Remote Dimming Drivers

1

Standard Output with 2+ Multiple Fixtures Per Driver
Connect up to four light fixtures at a time to one dimming driver for efficient power distribution and cost savings.

*Max Distance 50-100 Feet

No Em Battery Option Inverter (By Others) Possible

*Quantity of fixtures connected to driver depend on driver selection, please refer to spec sheets for more information. Contact your local USAI representative for additional driver layouts and different power requirements, or for custom configurations.

2

High Output with 1 Fixture Per Driver
Dedicating one fixture per driver provides optimal performance and best possible delivered light output

*Max Distance 50-100 Feet

EM Battery Optional 50 ft maximum distance

Remote Driver Applications Assistance

USAI offers applications assistance for configuration of remote drivers and remote driver enclosures. Contact your local USAI representative for additional driver layouts and different power requirements, or for custom configurations.

SNAP to Learn More

Single Driver Enclosure Options

For one remote driver at a time only.

Prewired Enclosures by USAI

Enclosures can house up to 12 dimming drivers.

Mounting Options

Choose the best option for your ceiling installation.

Surface Mount
The lowest profile installation possible, completed with no visible hardware.

Cable Mount
1/8" Ø high-tension shielded conductor cable is silver in color and can be adjusted in the field to desired length.

Not available with Adjustable and Wall Wash.

Pendant Stem Mount
3/8" Ø steel stem is provided in a powdercoat painted finish with either a 10° hang straight or a 30° hang straight. Hang straight details are shown below.

Hang Straight Options

Available with Pendant Stems Only

10° Hang Straight

30° Hang Straight

3 ways to stash your drivers

USAI's the LittleTwos are compatible with all common lighting controls. Choose from 0-10V, Phase, EcoSystem, DMX, or DALI dimming.

1 Recessed Rough-In Driver Enclosure

USAI offers recessed rough-ins which allows for placement of drivers in the ceiling at the light fixture location. Recessed rough-ins act as enclosures for drivers which can be accessed and serviced through the rough-in aperture behind the cylinder canopy.

Recessed Driver

- 5" Canopy
- High Output with **1** Fixture Per Driver

2 Canopy Mounted Drivers

USAI offers two driver canopy solutions – one for use with recessed junction boxes, and a driver canopy for use with surface mounted junction boxes.

Canopy Mounted Driver

- 5" Canopy
- High Output with **1** Fixture Per Driver

Canopy Mounted Driver

- Conduit Cutout Canopy
- High Output with **1** Fixture Per Driver

3 Remote Driver and Enclosures

For the remote drivers, you can use either 1 fixture per driver or multiple fixtures per driver (Max of 4 fixtures). Depending on your output preference.

Remote Driver

- 2" Canopy
- High Output with **1** Fixture Per Driver
- Standard Output with **2+** Multiple Fixtures Per Driver

Remote Driver

- Conduit Cutout Canopy
- High Output with **1** Fixture Per Driver
- Standard Output with **2+** Multiple Fixtures Per Driver

Optional USAI Enclosures

All remote drivers require enclosures by code. We make your specification process easier by offering different driver enclosures to fulfill all of your project needs. See page 8 for more information.

the LittleTwos™ LED Color Choices

Light is equally as precious as the finishes and materials in a room. Every space, object, or task has an ideal shade of light to be lit by. Choosing the right light can make everything, everyone, and the experience extraordinary. Offering white color temperatures ranging from 2200K to 6000K, the LittleTwos are available with **Classic White**, **Dim to Warm**, **Dim to Warm +**, and **Color Select Tunable White**. Choose the USAI LED color option(s) that's best for your next project.

Lobby 18' Ceiling

DESIGN GOAL: Create a well-lit and inviting atmosphere in a lobby with a high ceiling that allows occupants to navigate through the space intuitively. Utilize an efficient lighting scheme to achieve the average IES recommended light levels on all surfaces.

LAYER A SPECIFICATION:

Cable Mount Cylinder

FIXTURE SPEC: CLRD4-07V4C-35KH-15-WH

MOUNTING HEIGHT: 7FT

BEAM ANGLE: 15°

WATTAGE: 7W

COLOR TEMPERATURE: 3500K, 90+ CRI

DELIVERED LIGHT: 504 Lumens

GLARE (UGR): 11.7

LAYER B SPECIFICATION:

Trimless Round Downlight

FIXTURE SPEC: S2RD-15V2M-35KH-30-P1-WH

MOUNTING HEIGHT: 18FT

BEAM ANGLE: 30°

WATTAGE: 15W

COLOR TEMPERATURE: 3500K, 90+ CRI

DELIVERED LIGHT: 1382 Lumens

GLARE (UGR): 16

Smooth Transitions

SOLUTION: To meet the design goal, the lobby uses two layers of lighting. **Layer A, Cylinder** is placed 2’ on center to highlight the reception desk and provide adequate task lighting. **Layer B, Downlights** are used in an 8’x8’ spacing to provide even ambient illumination in this 18’ ceiling space. The lighting calculation below illustrates that this layout delivers over 110 footcandles on the work plane and over 17 footcandles on the floor. This design provides light levels that allow occupants to navigate intuitively through the lobby.

FLOOR PLAN: ○ A.Cylinder ● B.Downlight

LIGHTING INTENSITY

Avg On Floor: 17 FC
Max/Min: 3.6

Avg On Reception Desk: 100 FC
Max/Min: 5.7

30’W x 60’L x 18’H

Table Dimension:
2’W x 10’L x 3’-6”H

NOTE: Light level calculations reflectance values use standard 20% for floors, 50% for walls, and 80% for ceilings.

15° Beam Distribution

30° Beam Distribution

Open Office 9' Ceiling

DESIGN GOAL: Formulate an open office lighting design that provides sufficient light levels for productive work while at the same time minimizing glare for employees’ visual comfort. Utilize an efficient lighting scheme to achieve the average IES recommended light levels on all surfaces.

LAYER A SPECIFICATION:

Trimmed Square Downlight

FIXTURE SPEC: S2SD-15V2M-30KS-65-P1-BG

BEAM ANGLE: 65°

WATTAGE: 15W

COLOR TEMPERATURE: 3000K, 80+ CRI

DELIVERED LIGHT: 906 Lumens

GLARE (UGR): 18

LAYER B SPECIFICATION:

Trimmed Square Wall Wash

FIXTURE SPEC: S2SW-15V2M-30KS-W1-D1-SG

BEAM ANGLE: Wall Wash

WATTAGE: 15W

COLOR TEMPERATURE: 3000K, 80+ CRI

DELIVERED LIGHT: 830 Lumens

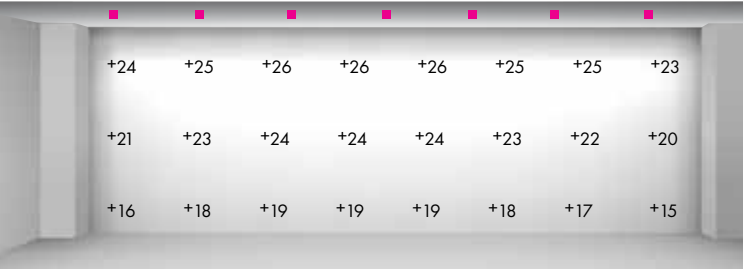

Lighting for Productivity

SOLUTION: Two layers of lighting are used to meet the design goal. **Layer A, Downlights** spaced 6'x 6' apart, achieve 44 footcandles on the work plane and 28 footcandles on the floor. This lighting layer provides even illumination for circulation and plenty of illumination for computer work, paperwork, and more. **Layer B, Wall Wash** spaced 3' away from the wall and 3' apart, achieves 21 footcandles on the wall. This lighting layer can be used to highlight artwork, graphics, or any vertical wall surface to create visual interest.

FLOOR PLAN: ■ A.Downlight ■ B.Wall Wash

NOTE: Light level calculations reflectance values use standard 20% for floors, 50% for walls, and 80% for ceilings.

65° Beam Distribution

Wall Wash Distribution

Airport 25' Ceiling

DESIGN GOAL: Typical airport terminals are voluminous spaces, with high ceilings and broad open areas. The intent is to utilize a low-glare ambient lighting scheme to achieve the average IES recommended light levels, create a sense of space, and guide traffic flow in the Airport terminal interior spaces.

LAYER A SPECIFICATION:

Trimmed Round Downlight

FIXTURE SPEC: S2RD-15V2M-40KH-30-P1-WH

BEAM ANGLE: 30°

WATTAGE: 15W

COLOR TEMPERATURE: 4000K, 90+ CRI

DELIVERED LIGHT: 1199 Lumens

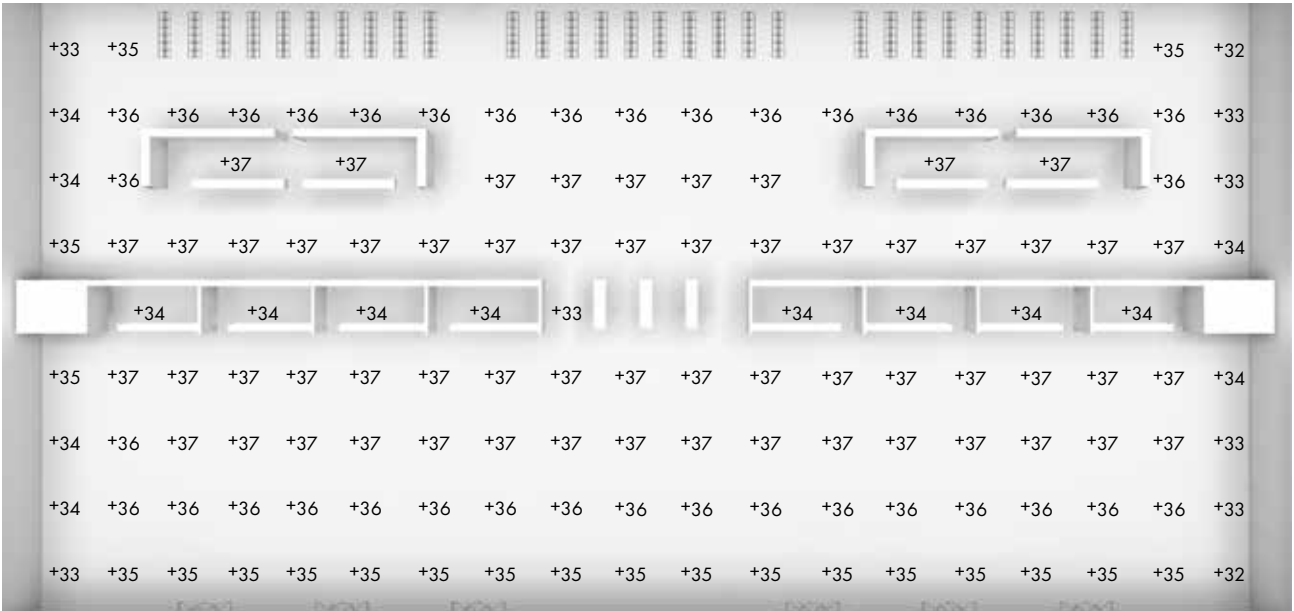

GLARE (UGR): 15.5

Small and Powerful

SOLUTION: The design strategy uses one layer of lighting to meet the design goal. **Layer A, Downlights** are spaced 8'x 8' apart and achieve 44 footcandles on the work plane and 24 footcandles on the floor. This lighting layer provides plenty of illumination for circulation, service stations, and any signage on the walls for wayfinding to retail shops.

FLOOR PLAN

LIGHTING INTENSITY

Avg On Floor: 23 FC
Max/Min On Floor: 3.4

Avg On Desk: 38 FC
Max/Min On Desk: 1

Table Dimension:
15'W x 2'L x 3'H

NOTE: Fixtures symbol indication not shown in the plan, refer to fixture spacing 8' by 8' calculation plan. Light level calculations reflectance values use standard 20% for floors, 50% for walls, and 80% for ceilings.

30° Beam Distribution

Home 12' Ceiling

DESIGN GOAL: Incandescent lighting is the most familiar and comforting light source for residential spaces because of the warm color temperature. Our intent is to utilize an efficient lighting scheme to provide a beautiful, dim to warm lighting experience with energy efficient LEDs and still achieve the average IES recommended light levels.

LAYER A SPECIFICATION:
Trimless Round Adjustable

FIXTURE SPEC: S2RA-15DW2-3020KH-65-WH
BEAM ANGLE: 65°
WATTAGE: 15W

WATTAGE: 15W
COLOR TEMPERATURE: 3000K, 90+ CRI
DELIVERED LIGHT: 603 Lumens
GLARE (UGR): 20.6

Layer Fixtures for Visual Hierarchy

SOLUTION: The design strategy uses three layers of lighting. **Layer A, Adjustable Downlights**, achieves more than 18 footcandles on the furniture and 16 footcandles on the floor. This lighting layer provides general illumination for the living area and can be aimed toward specific points of interest. **Layer B, Surface Mount Adjustable Cylinder**, achieves more than 42 footcandles on the wall art. **Layer C, Cable Mount Cylinder with Glow Glass**, achieves 70 footcandles on the bar top. This lighting layer highlights the bar with decorative glow glass and provides task lighting at the same time.

Focal Glow

SOLUTION: The lighting strategy uses three layers of lighting to meet the design objectives. **Layer A, Adjustable Pendant Cylinder** spaced 3' apart over the reception desk, provides 35 footcandles on that surface. **Layer B and C Adjustable** downlights with 20° & 30° beam distributions are spaced 6'x 6' on center to achieve 74 footcandles on the display cases and 18 footcandles on the lounge tables. The LittleTwos recessed adjustable downlight is an excellent choice for this purpose; the range of beam spread options allows light to be focused on specific product displays or seating areas without glare, yet still provides a cozy environment for clients. The recessed lighting shown here is installed with a millwork trim to blend seamlessly with the millwork ceiling materials.

FLOOR PLAN:

FAQs

<p>Q : How to aim the LittleTwos Pinhole adjustable?</p> <p>A : The adjustable 2" pinhole provides additional flexibility to light spaces with a 360° rotation and a maximum 40° tilt angle while maintaining a quiet below ceiling appearance.</p> <ul style="list-style-type: none">• Set Rotation: Insert small flathead screwdriver or hex driver tool into the rotation pocket and push to turn the trim to the desired angle. Rotation is smooth from 0° - 360° and is set and held with friction.• Set Tilt Angle: Insert hex driver tool into the adjustment screw and turn until desired tilt angle is reached. The screw can be seen easily from below, and tilt angle indicators are visible when the optic is removed.	 <p>Q : How can I get help with the project coordination process?</p> <p>A : USAI can help with project challenges and any performance or specification questions. Additionally, USAI offers application assistance to configure remote drivers and remote driver enclosures to streamline the project coordination process. Contact your local USAI representative with your project info and control zone load schedule for help planning driver layouts, power requirements, and custom enclosure configurations.</p> <p>Q: Which controls systems are compatible with the LittleTwos?</p> <p>A : As with all USAI Lighting products, the LittleTwos are compatible with every major architectural controls systems, including 0-10V low voltage dimming, line voltage phase dimming, and digital dimming protocols such as DMX and DALI. Wireless dimming controls are available by specifying the Lutron Athena dimming driver option.</p> <p>Q: Can I place LittleTwos in wet locations such as showers and outdoor covered spaces?</p> <p>A : Yes! The LittleTwos family is dry/damp/wet location rated and can be installed outdoors under covered ceilings.</p> <p>Q: Can I change the LittleTwos beam spread from below?</p> <p>A : Yes! Optics are field interchangeable. Please refer to the installation instruction and spec sheets optic media page for guidance.</p> <p>Q: Can I use the LittleTwos to meet my project's code requirements?</p> <p>A : Yes! The entire LittleTwos family is NRTL/CSA-US tested to UL standards. We offer airtight housing options, as well as Insulation Contact and Chicago Plenum rated housings. The LittleTwos can be used to meet LEED and WELL Building requirements, offer Title 24 JA8 high efficacy versions, and have Declare Labels with Red List Approved status. All products are IBEW union made. Contact USAI sales agents for assistance with for federally-funded US infrastructure project requirements such as the Buy American Act (BAA), Build America, Buy America (BABA) and Buy America.</p> <p>If your project requires something else not listed here, please don't hesitate to contact us!</p>
<p>Q : When should I use an install from below fixture vs new construction housing for the LittleTwos Pinhole?</p> <p>A : Projects with existing ceilings can use the LittleTwos Pinhole Retrofit fixture, which installs from below with a Flex Driver Case to house the dimming driver. This option is available for both trimmed and trimless fixtures.</p> <p>Projects that require fixture installations prior to finished ceiling installation can use the new construction tray accessory (NCT) to rough-in light fixture position. The RT fixture with Flex driver case can then be installed from below at a later time. Alternatively, we also offer IC and CP rated housings which are both serviceable from below, as well as an Above Ceiling Access only housing (ABC) which is a new construction service from above housing option specifically designed for ACT ceiling types.</p>	
<p>Q : How to aim the LittleTwos adjustable cylinder?</p> <p>A : The adjustable 2" cylinder can be surface mounted to the ceiling as a monopoint or suspended by a rigid stem to light spaces with a 360° rotation and a maximum 90° tilt angle.</p> <ul style="list-style-type: none">• Set Rotation: Simply turn the cylinder to desired rotation angle, friction will hold the position.• Set Tilt Angle: This is also a toolless adjustment, simply set the tilt position with your hand and friction will do the rest.	
<p>Q : What design challenges can the LittleTwos fixture family address?</p> <p>A : The LittleTwos Pinhole and Cylinder Family offers a wide range of product functions and mounting options – from standard regress downlight, deep regress comfort downlight, adjustable, and wall wash, to decorative glow glass options. With a range of wattages and lumen outputs from 500 to 2000 delivered lumens, the LittleTwos product family can be used in a variety of spaces, ceiling types and heights, to fulfill most project needs, including sloped and/or exposed ceiling types.</p>
